

Abstract

Title:

Analysis of the elite tennis players for the selected match

Objectives:

The aim of the work was to find out the frequency, effectiveness and success of the elite players in the selected French Open 2018 match. This was the final match of this tournament, where i analyzed every forehand.

Methods:

The analysis was done by observing video recordings of final matches from the French Open 2018. This was a notation analysis. The results were recorded in pre-created tables and then converted to charts.

Results:

The results show us which player has used the forhend, where the forhend was more successful, more efficient, and in which direction it was played.

Keywords:

forehand, frequency, efficiency, success rate
